Breathe Safe With Eco-Friendly Coatings

Muralo introduces Breathe Safe Interior Water-Based Zero-VOC finishes, its new line of eco-friendly interior products. Breathe Safe is a virtually odorless, high-performance, water-based latex, formulated with no harmful solvents. Based on a sustainable chemistry technology, it meets or exceeds Green Seal and LEED green building requirements and is ideal for use in nursing homes, schools, babies' rooms and health care facilities, as well as the hotel/motel industries. It is specified for space that is occupied during painting. Breathe Safe is available in Flat,

Eggshell, and Semi-Gloss finishes, and it can be tinted to any color. For more information contact: The Muralo Company, (800) 631-3440, www.muralo.com.
