Enviro-Solutions introduces ES 82

Made of an acrylic polymer blend, ES 82 can resist penetration of more than 30 common stains and soiling agents.

ES 82 from Enviro-Solutions is a floor sealer/finish made of a blend of acrylic polymers that provides protective properties. It resists penetration of more than 30 common stains and soiling agents. Highly durable ES 82 is ideal for scrubbing and recoating or for spray buffing to help restore floor shine using floor machines with up to 1,000 rpm. ES 82 is also UL approved for slip resistance and is zinc-free. It has been certified environmentally safe by both Green Seal and EcoLogo.

MURALO INTRODUCES BREATHE SAFE ZERO VOC PRIMER

Muralo has introduced Breathe Safe Water-based Zero VOC Interior Primer. Formulated with no harmful solvents, Muralo Breathe Safe Interior Primer seals unpainted and painted drywall, plaster and wood trim and it's specified for space that is occupied during painting. Muralo Breathe Safe is a virtually odorless, water-based latex, based on a sustainable chemistry technology. It meets or exceeds Green Seal and LEED green building requirements. It is ideal for nursing homes, schools, babies' rooms and health care facilities, as well as the hotel/motel industries. Also available in the Breathe Safe line are the Flat, Eggshell and Semi-Gloss wall finishes, which can be tinted to any color, and a Ceiling White Paint.

DUNN-EDWARDS INTRODUCES BLOC-RUST PREMIUM

Dunn-Edwards has introduced Bloc-Rust Premium metal primer in white and red oxide that uses an advanced waterborne alkyd technology. It offers corrosion resistance and adhesion on a variety of interior and exterior ferrous and non-ferrous metal surfaces. This alkyd emulsion formula provides the application properties of an oil-based

primer, according to the company. It is easy to apply and has excellent flow and leveling for a smooth finish. Unlike an oil-based primer, it is low odor and fast drying.

AKZONOBEL POWDER COATINGS LAUNCHES INTERPON A RANGE

AkzoNobel, the world's leading automotive powder paint supplier has launched Interpon A, which brings together the company's range of automotive powders into one clear and comprehensive global collection. Interpon A's global standardization allows customers to quickly identify products from one of six ranges—underhood/body, interior trim, exterior trim, alloy wheels, powered wheels and body shell. Within each range, products are broken down into more specific categories which detail, for example, their performance capabilities, energy requirements, color range and approved manufacturers. One of the latest additions to the Interpon A range is a low temperature cure primer that reduces curing time by 20 degrees centigrade, allowing energy cost savings.

CORROSION PREVENTATIVE CONTAINS NO VOCs.

Birchwood Casey has launched Dri Touch Non-VOC. Applied to wet or dry metal surfaces, Dri Touch Non-VOC forms colorless dry-to-touch protective film that resists atmospheric humidity and corrosion. Pale, amber liquid has 248°F flash point and film thickness of 0.15 mil, providing effective coverage of 1,500 sq ft/gal. Rated for 100-150 hr salt spray and 600+ hr humidity protection, Dri Touch Non-VOC meets water displacement test Mil-C-16173 and stain test Mil-C-22235A. It can be used without causing air contamination or fire safety problems. **CW**
