Ceramic Coating The Muralo Company

Muralo's NanoKote™ waterborne ceramic paint has been made available to allow for a painted wall surface that is resistant to water marks and streaking. It also has an impervious, smooth film that is easy to wash, keeping the wall surface clean. This coating can be used on new or previously painted surfaces, including wallboard, drywall, trim, plaster, and acoustical surfaces. It is designed for use in hospitals, restaurants, hotels, schools, universities, and all commercial buildings. Plus, NanoKote is suitable for kitchens and bathrooms, areas that are more susceptible to mold and mildew growth. This product is available in Eggshell, Satin, and Semi-Gloss finishes, and it can be tinted to hundreds of pastel and medium-tone colors.

High-Capacity Brushes Purdy

Purdy Pro-Extra brushes feature extra-thick, extra-long filaments intended for outstanding paint-holding capacity and long brush life. These brushes offer a special DuPont filament blend of Tynex® nylon for softness and ease of paint flow, Orel® polyester for stiffness retention, and Chinex® for fast clean-up. Purdy's proprietary tipping and flagging methodology aims to ensure exceptional paint distribution. These premium-quality applicators hold and distribute a remarkable amount of paint, so painters can use their Pro-Extra brushes to complete their projects fast and then move on to the next job, according to the company. Purdy has recently launched three new Pro Series models (Monarch, Pip and Moose) to add to the existing Dale, Elasco, Glide, Sprig, and Swan product lines.

INTERIOR

Microfiber & Polyamide Covers The Wooster Brush Company

Microfiber and polyamide fabrics are now available from Wooster. Micro Plush™ is made with professional white microfiber fabric, which is very soft and silky to the touch. For use with all paints and enamels, the tiny fibers are intended to deliver a uniform finish. This roller is suitable for smooth surface applications, although it is chosen as a finishing tool, not for speed in coverage. In addition, Wooster Cirrus™ is made from polyamide yarn and offers high-capacity, durability, and density to reduce spatter. The "bulkiness" of the fabric makes it great for high production on rough surfaces, but it also performs well on drywall or light textures. Painters might enjoy it for back-rolling as well as painting. Cirrus is for use with all flat paints, stains, sizings, and waterproofing sealers.

Paint & Finish Removers Zinsser Company Inc.

The Zinsser Paint and Finish Removers line is intended to include everything professionals want and need for a successful refinishing project:

- Traditional Paint Removers: The new line features three traditional methylene chloride removers (Power Stripper, Spray-On Stripper, Paint & Varnish Stripper) formulated to tackle the toughest jobs.
- Specialty Project Removers: Project-specific methylene chloride paint and finish removers in the line include Furniture Refinisher, Detail Stripper, and Adhesive Remover.
- Eco-Friendly Removers: For customers looking for alternatives to traditional paint removers, the line also includes three "green" options.
- Products for Wood Preparation and Clean-Up: Zinsser Wood Bleach, Paint Deglosser, Stripper Wash, and Brush and Roller Wash
